

Metadata Maestro Download Instructions

Metadata Maestro can be downloaded from

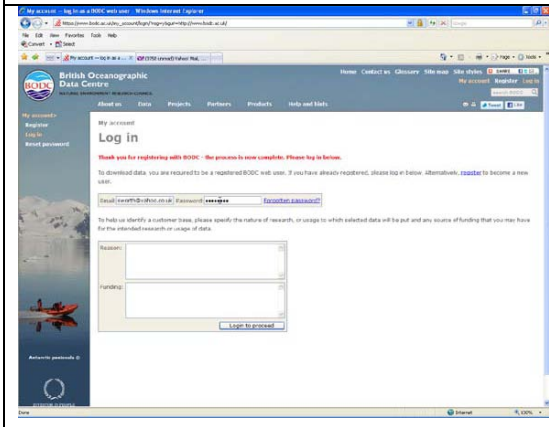

http://www.oceannet.org/marine_data_standards/metadata_maestro.html

Registering and agreeing to the license conditions is required first which is done via a BODC registration procedure. By doing this we can keep users aware of updates. By downloading the Metadata Maestro tool you are agreeing to the licence conditions for this application, which specify that your contact details will be passed to the application developers, Seazone.

	<p>Got to http://www.oceannet.org/marine_data_standards/metadata_maestro.html and click download</p>
	<p>Log in if you are already registered with BODC, else click 'register' to go to the User registration form</p>
	<p>For new registrations complete the form. An email with an alphanumeric code will be sent to the email address you registered immediately.</p>

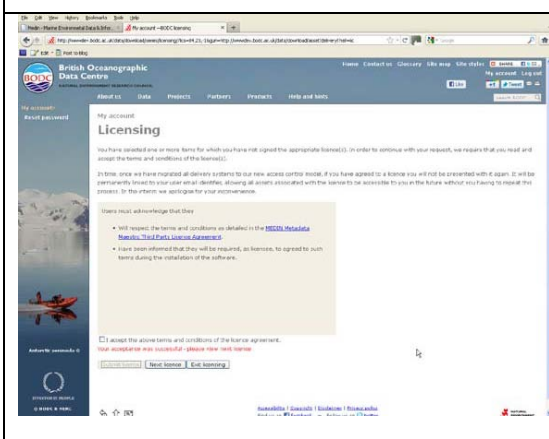

Copy and paste the alphanumeric code into the webpage to complete registration.

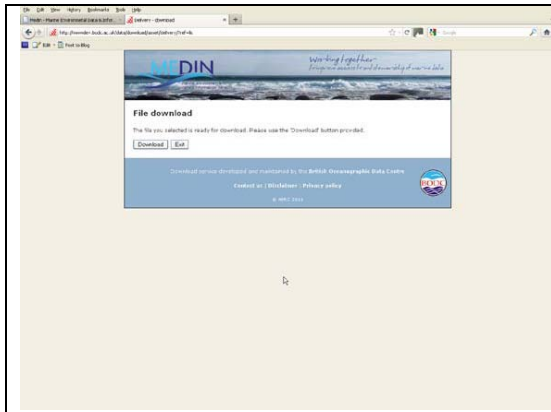

Log in with your email address and new password.

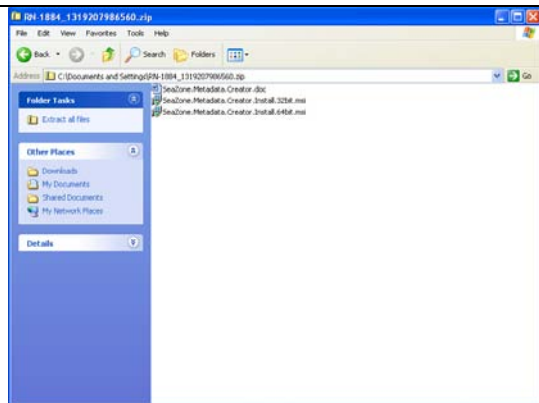

Click on 'Sign licence'

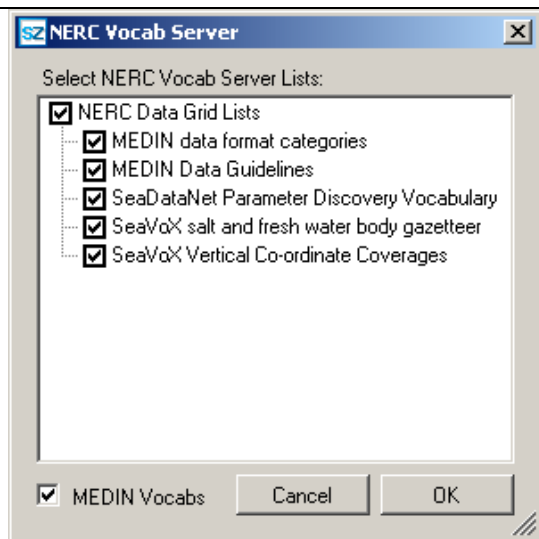

If you accept the terms and conditions of the licence(s), tick the box and select 'next licence' until all licences have been signed. Then click 'submit license'.

Now click to download Metadata Maestro. A zipfile containing the maestro and userguide will then be downloaded. You should unzip this file to your required location.

Now click to download Metadata Maestro. A zipfile containing the maestro and userguide will then be downloaded. You should unzip this file to your required location.

When you run the programme for the first time, you will be asked to update the NERC Vocab server lists. Instructions are contained in the 'Metadata Maestro User guide' supplied in the zip file on p22.

Upgrading from a previous version

If you are upgrading from a previous version of Metadata Maestro, you will need to uninstall your current version.

On installation, Metadata Maestro will try to overwrite or recreate certain program-specific files that you may need access to after installation. Because of this, it is recommended that you rename or backup your Local Application Data Folder for Metadata Maestro prior to installation (C:\Users\[user]\AppData\Local\SeaZone\Metadata Maestro Data or C:\Documents and Settings\[user]\Local Settings\Application Data\SeaZone\Metadata Maestro Data).

After installation you may then want to move your previously cached data files back into the Metadata Maestro Local Application Folder.
